Purpose: This guideline identifies the procedure for generator maintenance and cleaning on apparatus.

Scope: All personnel

Responsibility: It is the responsibility of all personnel to adhere to this guideline.

During monthly apparatus checks, generators should be:

1. Checked for appropriate fuel and oil levels.
2. Checked for starter rope condition –as appropriate.
3. Started using pull handle and electric ignition as appropriate.
4. Load tested.
5. Refuel as needed - outside of building.
6. Cleaned using a rag with degreaser or similar type agent.
7. Checked for air filter cleanliness.

Report any problems found.
